Corrosion Resistant Solutions

developed

by GOEBEL

to Minimize CUI

"QUALITY THE FIRST TIME"

INNOVATIVE FASTENER SOLUTIONS

GOEBEL is the leading global specialist for innovative fastener solutions and we focus extra attention on corrosion resistant products. High-quality materials, such as Stainless 316L & DUPLEX 318LN, are what our new products are created from; which are self-tapping screws & waterproof rivets. These are widely used in offshore, oil & gas, marine applications and areas where chlorides are present. GOEBEL offers the largest range of innovative fastener solutions in the industry with locations around the world!

CORROSION SOLUTIONS

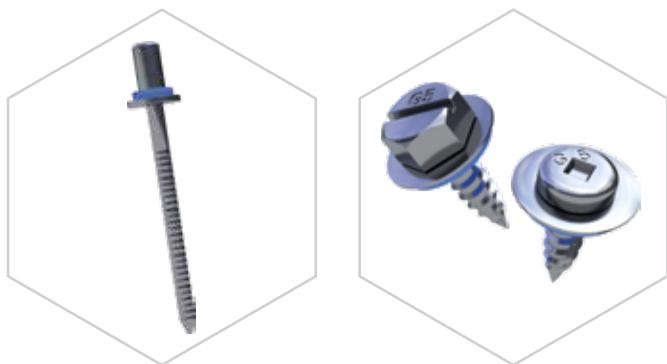

Low quality fasteners can increase the chance of corrosion. Due to the physical geometry of the fasteners used and other rough surfaces, aggressive compounds such as chlorides (salts), acids (sulfuric acid) and alkaline solutions (cleaning lye) adhere better. The interaction of the compounds with the UV radiation drastically accelerates the process of pitting and crevice corrosion at these sites.

**DUPLEX 318LN**

material is categorized by its excellent strength, ductility and fatigue resilience in combination with respectable overall, pitting, crevice and stress corrosion properties

DUPLEX 318LN & 316L Fasteners

GOEBEL Groups newly developed screws are made from DUPLEX AISI 318LN (1.4462) with a characteristic PRE 36 value; in addition our sealing CUP blind rivets are made of AISI 316L (1.4404) with a representative PRE 23-28 value. Both material qualities are solutions to minimize corrosion and decrease the chances of CUI as a result of the fastener application.

$$\text{PRE} = 1 \times \% \text{Cr} + 3,3 \times \% \text{Mo} + 16 \times \% \text{N}$$

“QUALITY THE FIRST TIME”

MODERN SOLUTIONS FOR TODAYS INDUSTRY

Best in class corrosion resistance, reliable long-term performance, waterproof consistency and installation is quick into stainless steel metal jacketing applications.

In conjunction with insulation and construction, the implementation of a suitable metal jacketing system is very important as it provides the foundation for longevity, low maintenance costs, and reduced insulation heat losses. In addition, the importance in using the correct quality of fasteners such as banding, screws, and/or blind rivets plays a decisive role.

Self-Tapping Screws made from AISI 318LN **DUPLEX** material are 3x harder than AISI 304 or 316 due to the austenite and ferrite structure that ensures a reliable threaded connection without the risk of stripping the threads.

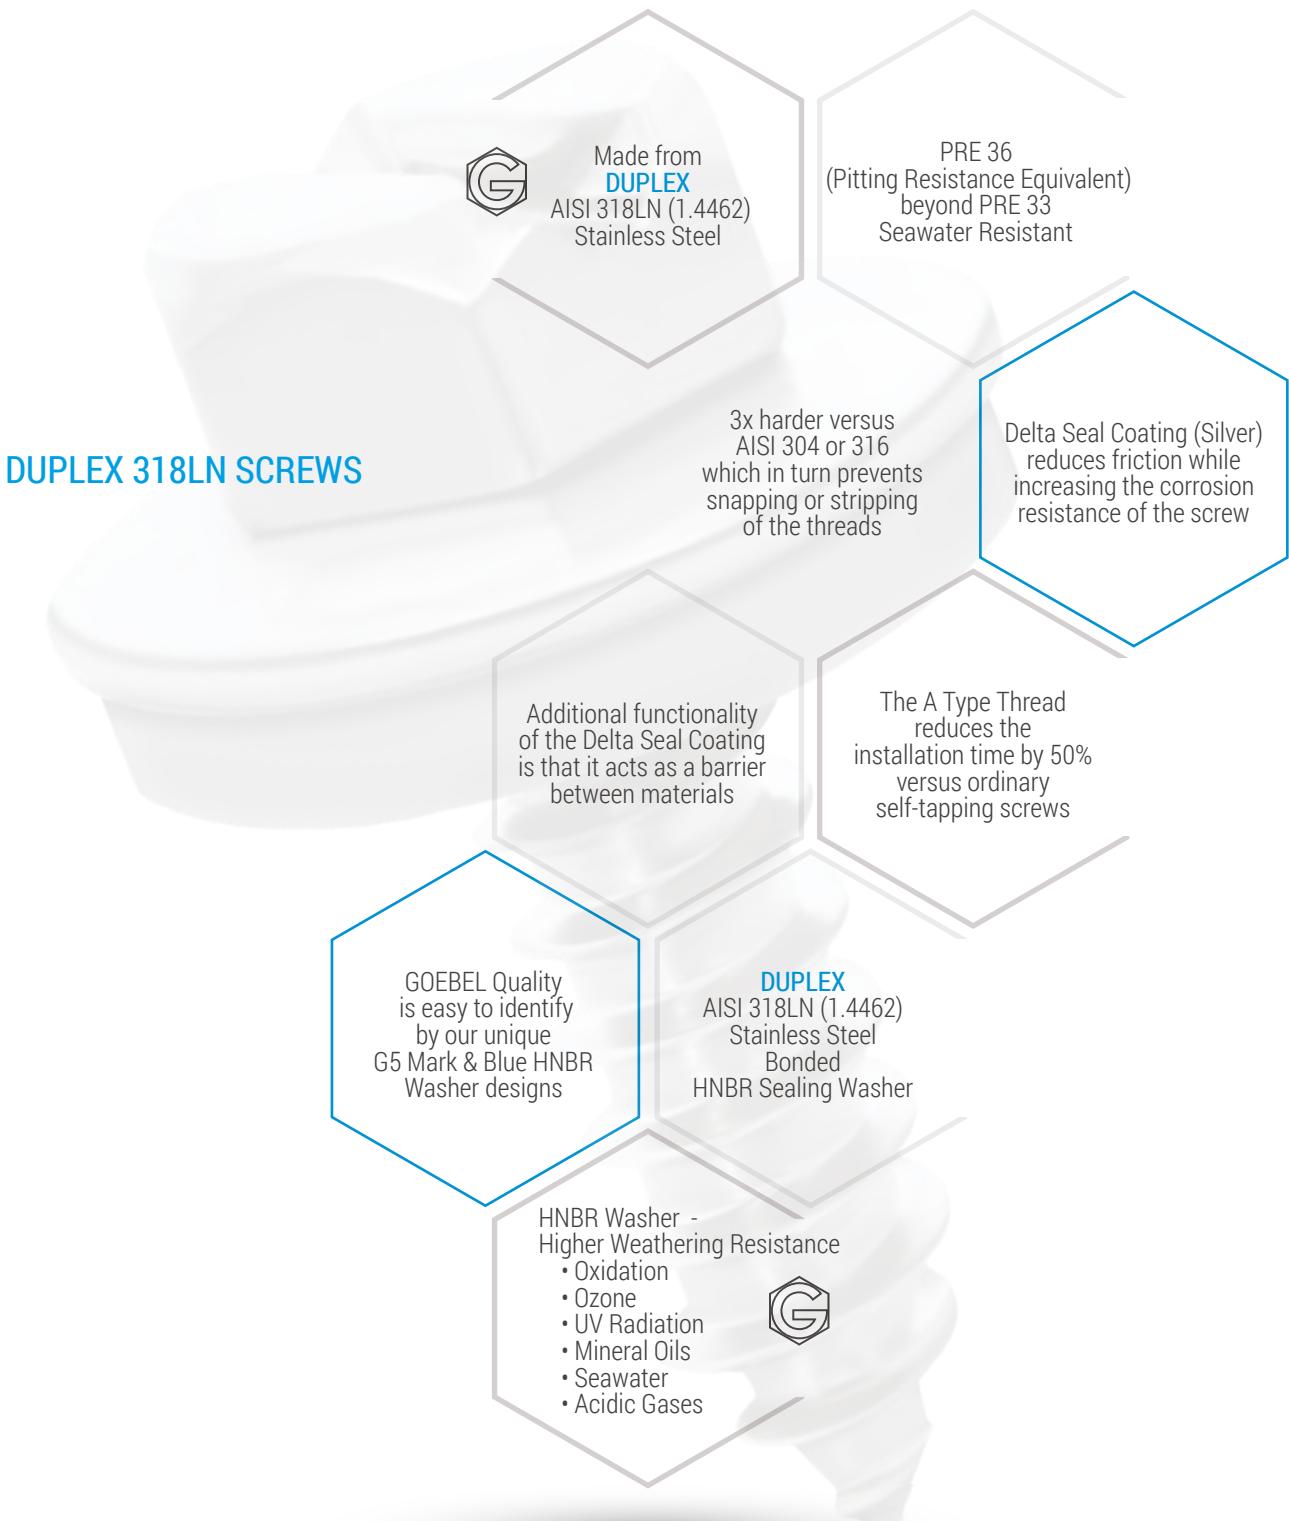

Sealed Type CUP Blind Rivet –
Designed from Top Quality Stainless Steel;
these are a combination of materials
AISI 316L & AISI 318LN paired with a
HNBR sealing washer resulting in a
100% waterproof application.

THE BENEFITS:

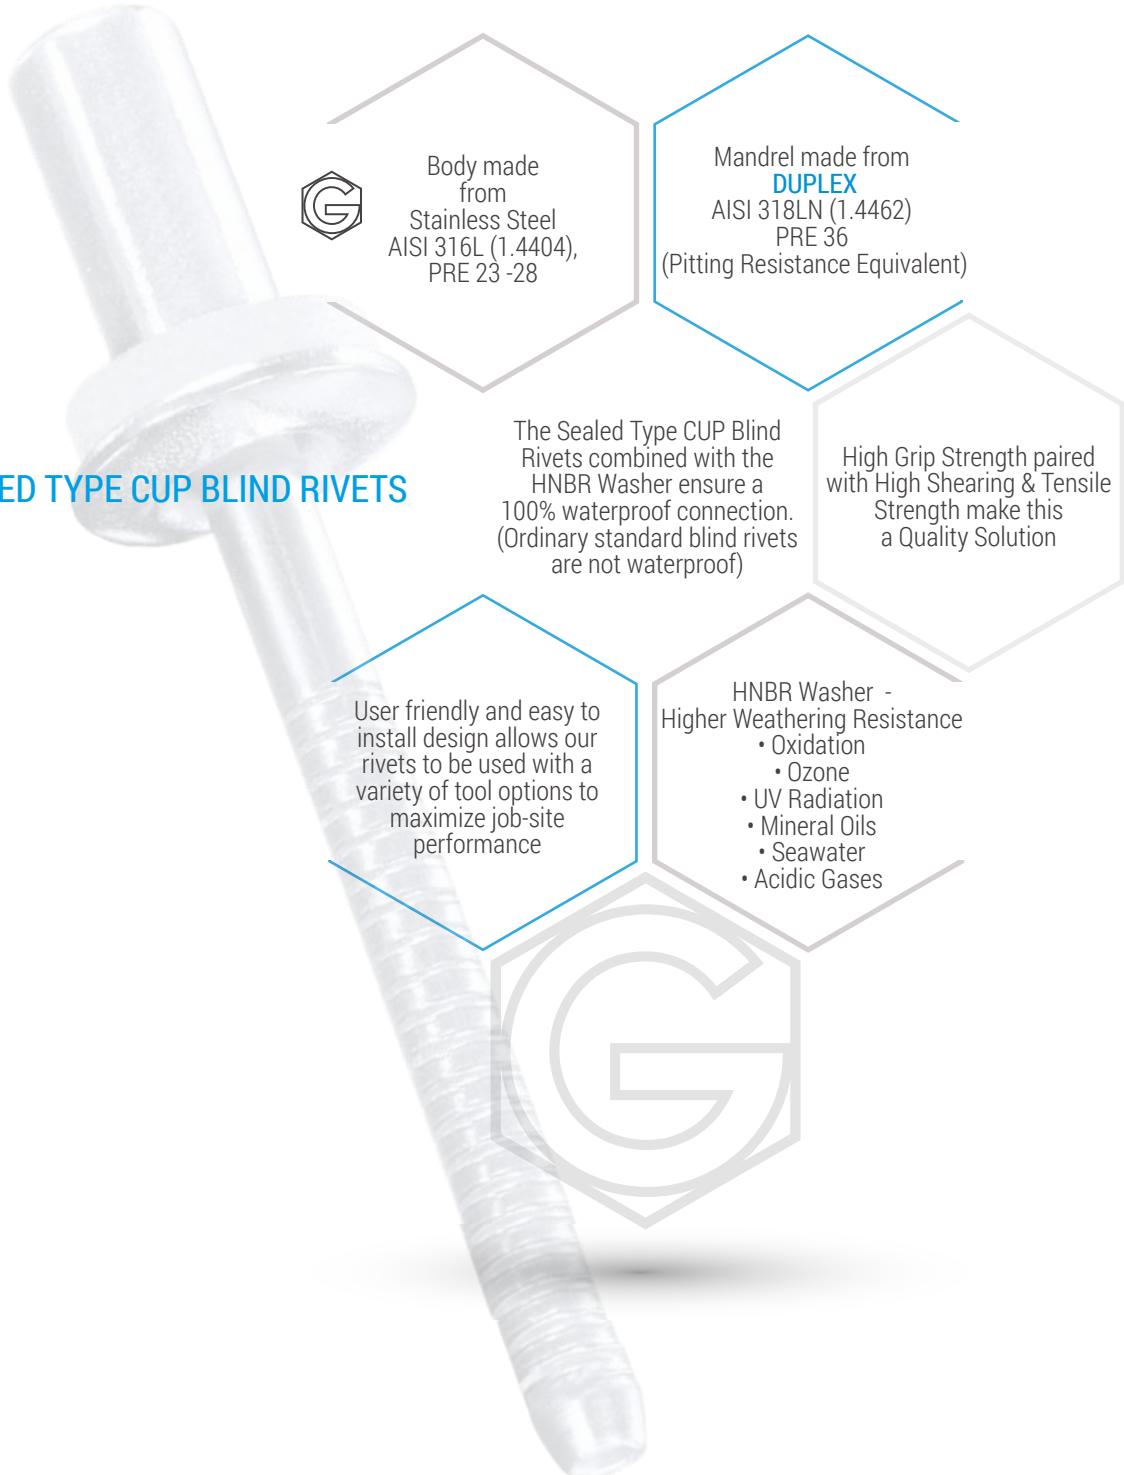

Safety and reliability remain paramount in our industry on a day to day basis. Our products are used in a large amount of critical applications that demand longevity, durability, and consistent quality. All these characteristics paired with our easy to identify unique designs, specifically the G5 mark and the blue HNBR sealing washer, make our fastener solutions a versatile option for a variety of applications.

GOEBEL SILVER GL SLIDE COATING - DELTA SEAL COATING

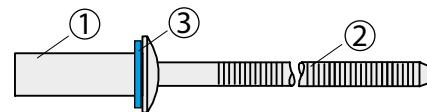

The Goebel Silver GL Slide Coating provides optimum sealing with multifunctional characteristics that guarantee exceptional corrosion protection while simultaneously reducing the screw-in resistance.

It is environmentally safe and free from any heavy metals that are harmful to one's health. The coating is available in various colors (i.e. silver, black, green and red).

Properties: superior adhesive strength, high level of hardness with good flexibility, high abrasion resistance, good resistance to weathering, (but not chalk resistant), high electrical insulating property (good protection against contact corrosion), superior resistance to chemicals proven in salt spray test, excellent resistance to sulphur dioxide proven in Kesternich test, excellent resistance to mineral oil, fuels, lubricants (i.e. grease, brake fluids, coolants, etc.)

	$S \leq 0.062" (1.6 \text{ mm})$	= #8 (4.2 mm)	.13" (3.3 mm)
	$S \geq 0.062" (1.6 \text{ mm})$	= #10 (4.8 mm)	.157" (4.0 mm)

Self-Tapping Screws are also available with or without washers.
Options include white Polyamide (6.6) or AISI 316/EPDM Washer.

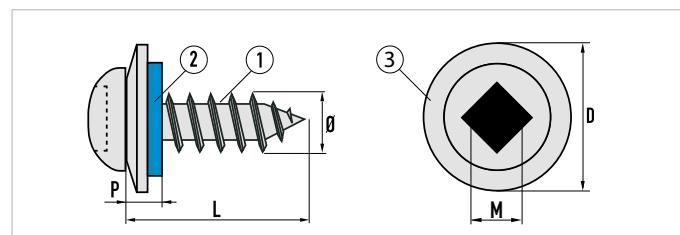

**ROBERTSON PAN-HEAD SELF-TAPPING SCREW
W/ ASSEMBLED DUPLEX HNBR WASHERS
W/ DELTA SEAL COATING SILVER**

IMPROVED HEAD DESIGN TO PREVENT STRIPPING

Type A Threads Increase Cost & Time Efficiency by 50%

- (1) DUPLEX AISI 318LN (1.4462)
- (2) HNBR SEALING WASHER (BLUE)
- (3) DUPLEX AISI 318LN (1.4462)
